Abstract

Convert the datatype of a list of objects This task is part of the daltools package

1 Instruments/Modes

Instrument	Mode

2 Use

3 Description

Convert the datatype of a list of objects

This task converts the type of each of a list of objects (columns and/or arrays) to the given data type. No consideration is given to overflow or null values.

4 Parameters

This section documents the parameters recognized by this task (if any).

Parameter	Mand	Type	Default	Constraints
objects	yes	StringList		

List of fully qualified names of the objects

type	yes	String	int8	

The data type to convert to

5 Errors

This section documents warnings and errors generated by this task (if any). Note that warnings and errors can also be generated in the SAS infrastructure libraries, in which case they would not be documented here. Refer to the index of all errors and warnings available in the HTML version of the SAS documentation.
